SUMMARY

I'm a full-stack software developer driven to produce quality products that delight customers, dedicated to supporting my community by running a 400+ member meetup for women of color in technology. I thrive on making a difference by bringing talented people together to learn and grow.

WORK HISTORY

MergeOwl / Contract Front End Engineer

2020

- Updated ReactJs, and converted class to functional components.
- Utilized Material UI to update the styling of the navigation bar, and icons.

Ladders / Software Engineer

2018 - 2019

Collaborated with product, engineering, and design teams in an Agile and continuously integrated environment creating and maintaining features for a professional community and recruitment platform, including:

- Designing product features which increased signups.
- Creating AB variants of the homepage and paywalls with over 2 million monthly visitors(ReactJs, HTML, SCSS, JavaScript, AWS Jenkins).
- Implementing Google tags to track clicks and conversions.
- Coding mobile responsive front-end pages, email templates, sign-up flows and adjusting models(ReactJs, AWS Jenkins).

Strong contributor on the team, building relationships between engineering, product and design, a leading voice for creatively solving problems, sharing best practices, and improving workflow.

Highlights:

- Implemented 5 different audience experiences based on individual user data for email campaigns, and experiments(SQL, and Java).
- Created a new A/B test process that allows project managers to easily view all tests, which reduced meeting times between project managers, and engineers.

Diligent / Customer Support Specialist

2014 - 2018

- Received over 300 surveys with positive feedback on effective verbal communication skills on technical functionality to non-technical clients, diagnosing and resolving technical issues, and customer satisfaction.
- Adjusted product experiences to meet the client's goals by liaising with engineers, and customer success.

COMMUNITY INVOLVEMENT

We Build Black / Community Organizer

A non-profit organization on a mission to empower underserved communities through technical education, mentorship, and career development.

My work is focused on our women's empowerment initiative She Builds Black, through which we facilitate career development and community building events year round:

- Managed and organized the Mavens I/O annual technical conference with over 150 attendees, and several technical tracks touching on devops, software engineering, design, and data science.

PROFICIENCIES

ReactJs - Redux -
HTML - SCSS - CSS -
JQuery

Ruby on Rails - Java -
Ruby

Google Tag Manager -
Google Analytics

SQL - API design -
RDBMS - RESTFUL
APIs

JIRA - Confluence -
Git - Agile
Development

AWS Jenkins

Education

Flatiron School 12/2017

Full Stack Web
Development Online
Program

New York University 01/2013

Bachelor of Arts degree
in Economics
